Summary

Motivated Computer Science and Engineering student with a strong interest in software development, cloud technologies, and emerging AI technologies. Possesses foundational knowledge of Python, SQL, AWS, web technologies, APIs, and software development concepts gained through academic learning, internships, and projects. Familiar with using AI-assisted tools for learning and improving development productivity. Eager to strengthen technical skills, apply analytical and problem-solving abilities, and learn to contribute effectively to modern software development and cloud-based solutions.

Experience

Cyber Security & Ethical Hacking Intern, Innovate Intern ***Completion Certificate*** *February 2025 -May 2025*

- Gained practical knowledge of cybersecurity fundamentals, including secure systems, vulnerability awareness, and information security best practices.
- Developed a Blockchain-Based Voting System project to explore secure, transparent, and tamper-resistant digital voting using blockchain technology.

Cloud Computing, Tamizhan Skills ***Completion Certificate*** June 2025 – July 2025

- Acquired practical knowledge of cloud computing fundamentals and AWS cloud services.
- Developed and deployed cloud-based applications through hands-on projects involving AWS, EC2, S3, CloudFront, and serverless technologies

Projects

1. **IP/Domain Info Lookup Tool** ***GitHub*** *November 2025*
   - Developed an application to retrieve and analyze IP address and domain information.
   - Integrated external APIs to fetch data such as WHOIS, geolocation, security reputation, and threat intelligence.
   - Built functionality for processing user inputs and displaying retrieved information through an interactive interface.
   - Applied API integration and database concepts for managing application data.
2. **Website Deployment & Portfolio Hosting on AWS** ***GitHub*** *February 2025*
   - Deployed dynamic and static websites using AWS EC2 and AWS S3 with proper configuration of networking and security groups.
   - Integrated CloudFront CDN for faster global content delivery and reduced latency.
   - Built a serverless contact form using AWS Lambda, API Gateway, and DynamoDB to demonstrate scalable architecture.
   - Configured custom domain and HTTPS for secure, professional presentation of portfolio projects.

Technical Skills

Technical Knowledge: Python, SQL, HTML
Cloud Technology Concepts - AWS(Basics), Basic Cloud Security, Network Security, DNS & Domain Configuration, API
Cyber Security Concepts - OSI Model, Network Security, Vulnerability Assessment, Information Security Fundamentals
Concepts: Cloud Computing, Cybersecurity, OOP, DBMS, Basic understanding of AI
Tools & Platforms - Git, GitHub, VS Code
Soft Skills - Problem-Solving & Critical Thinking, Creativity & Innovation.

Education

Jain (Deemed-to-be) University ***Bengaluru, India***

Bachelor of Technology in Computer Science Engineering in Cloud Technology and Information Security - CGPA 8.8/10 *July 2023 – July 2027*

Activities & Achievements

Award: Appreciation Award —GRInova (Grassroots for Research and Innovation) |Recognized for the project HealthShield: AI Powered Cybersecurity Framework for Digital Healthcare.
Certification: Graph Theory Programming Camp — Algo University | Completed under the mentorship of Code forces Master Manas Kumar Verma, conquering 17 advanced graph problems.

Additional Information

Languages - English, Hindi, Nepali
Strength - Quick Learner, Adaptability, Teamwork, Time Management, Attention to Detail, and Strong Willingness to Learn.
